

R-Series Reel Capacity

Calculation Formula

R300 (S,L,CN,BN) $L = \frac{43}{D^2} \times 0.6$ (ft)

R380S $L = \frac{93}{D^2} \times 0.6$ (ft)

R380D $L = \frac{82}{D^2} \times 0.6$ (ft)

R460S $L = \frac{172}{D^2} \times 0.6$ (ft)

R460C $L = \frac{148}{D^2} \times 0.6$ (ft)

Formula Example:
 L-4E308P Cable O.D. is .603”
 $93 \div (.603 \times .603) \times .6 = 155$
 An R380-S Cable Reel will hold approximately 155 feet of Detachable Cable.
